phishing box

PhishingBox is an online tool for performing social engineering testing, allowing you to easily conduct simulated phishing attacks to test and train employee security awareness with our holistic ecosystem.

Real-World Phishing Simulations Strengthen The Human Firewall

The human element is often the weakest component in a company's security ecosystem and attackers exploit this fact. Phishing attacks are on the rise and more sophisticated than ever before.

- 82% of breaches involve the human element
- 35% of ransomware attacks are delivered via email
- 60% of social engineering attacks begin with phishing
- 14% of business email compromises in the United States recovered none of their financial losses in 2022

PhishingBox allows you to control every aspect of your phishing awareness program with pre-configured, customizable phishing tests and online courses.

Keep your employees at the highest level of security awareness through continuous training and testing to enhance your overall security posture.

Phish
Continuously phish your employees to maintain a high level of security awareness. Our system features professionally-designed phishing templates and allows full customization to fit your needs.

Train
Train your employees on the risk and prevention of phishing using teachable moments or complete courses. Select from our established courses or create your own.

Analyze
Analyze test results and validate security awareness with robust reporting. Obtain aggregate reports or get details on specific personnel.

FEATURE DETAILS

Easy-To-Use

The intuitive menus and step-by-step guides limit training time and allow non-experts to use the system. At the same time, the system provides access to advanced features for customization.

Unlimited Testing & Training

There are no additional fees for conducting multiple phishing and training campaigns. This feature allows you to re-evaluate employees as needed.

Automated Workflow

The system is designed to walk users through setting up and running a test. The automated workflow saves time as tests are easily configured and scheduled.

Customizable Templates & Courses

With pre-designed phishing templates and training courses, you can be up and running in minutes.
All templates and courses can be customized as necessary. This includes a website cloning feature for quick template creation.

Multiple Training Options

Use any of our built-in training moments, learning courses, phishing tests, or customize/build your own courses.
We also integrate with existing LMS platforms.

Interactive & Robust Reporting

With many reporting options available, you'll have the information you need to assess and mitigate phishing risk in a usable format.
Easily access trends and deep metrics through the Group Details section or pull specific reports in our dedicated reports module.
All reports can be filtered by specific criteria and all data is exportable for use in other systems.
